

For private hospitals and healthcare groups

The intelligent front door to your hospital.

Give every patient and visitor a 24/7 AI concierge on your website, QR codes and voice. It answers only from your hospital's approved information, and hands over to your team when a person is needed.

The friction every hospital knows

Patients don't think in departments

They ask about "knee pain" or "my MRI tomorrow", not your org chart.

Answers are buried in PDFs and pages

So patients call or queue instead of finding them online.

Front desks repeat the same answers

Directions, documents, timings and parking, all day, every day.

Leaders can't see where patients struggle

Unanswered questions and confusion stay invisible.

One platform. Four touchpoints.

cosmironexai.com

Website assistant

Services, doctors, visit information and booking links, in plain language.

QR concierge

Scan at the entrance, lifts or OPD for directions and help. No app needed.

Voice, English & Hindi

Patients simply speak and hear a clear answer. Ideal for older visitors.

Patient insights

See what patients ask, in which language, and what they couldn't find.

What patients ask, answered 24/7

Every answer comes from content your hospital approves. Every next step links to your existing booking system or team.

Find a service

"Do you offer MRI scans?"

Find a doctor

"Which cardiologists are available?"

Book or reschedule

"How do I book an appointment?"

Prepare for a visit

"What documents should I bring?"

Navigate the hospital

"Where is Radiology?"

Visitors and families

"What are visiting hours today?"

Billing and insurance desk

"Where do I submit insurance papers?"

Talk to a person

"Can I speak to someone?"

Built for healthcare, safely

IT DOES

- ✓ Directions and facilities
- ✓ Services, doctors, packages
- ✓ Booking links and handoffs
- ✓ Visitor and billing help

IT DOES NOT

- ✗ Diagnose or triage
- ✗ Advise on medication
- ✗ Read medical records
- ✗ Replace clinicians

No login needed for patients. Emergency questions are directed straight to your hospital's emergency pathway.

Built for

Premium private hospitals

Multi-location hospital groups

Diagnostic and imaging networks

Eye, dental and fertility chains

Medical-tourism hospitals

Go live in four steps

- 1 Share approved content: website, PDFs, service and doctor lists.
- 2 We set up your services, languages and handoffs.
- 3 Add the website widget and place QR codes.
- 4 Review patient insights and keep improving.
